TEN WAYS TO IMPROVE YOUR SCORE

1 Quarterly for 24 months: Hold a new bike event. Consider open streets events. Teach riding and mechanical skills to youth. Count attendees.

2 Next 12-24 months: Launch or expand public bike share. Use ambassador programs to establish community leaders as system spokespeople. Count rides.

3 12-24 months: Create a Vision Zero policy with measurable goals and a clear timeline. Measure current safety to create a baseline.

4 12 months: Use a crowdfunding campaign to build community support for an easy, visible protected bike lane. Measure "before and after" data.

5 Plan a bike network linking multiple districts. Use neighborhood bikeways on quiet streets, protected bike lanes on busy ones. Build in 24 months.

6 Improve bike/walk links to parks, trails & mountain bike areas. Make at least one new link each year, prioritizing areas with low recreation access.

7 12 months: Build a diverse mobility advisory team. Prioritize people in underserved or fast-changing areas. Identify those not at the table.

8 Map assets like businesses, parks and events to showcase the strengths of underserved areas. Focus attention on helping people access those assets.

9 Implement one pop-up event or pilot bikeway project this year using temporary material: paint, planters, pallet furniture. Count attendees.

10 Choose one neighborhood, recruit local leaders and plan a full network of low-stress bikeways that can be built with interim materials in 24 months.
